

The Return of the God of War [The Protector] Chapter 1888

Hearing this name, everyone's complexion changed drastically, and they all gasped.

As if this title is a taboo!

"Quickly, quickly! Immediately!"

"He is the only one!"

...

Jingcheng, in the private hospital of Wen's family.

Zoey just recovered, she looked out the window in a daze.

Wen Lei felt that she was colder than before, even ruthlessly cold-blooded.

But all kinds of experts in the hospital have checked all kinds of equipment, and the plum is fine.

Wen Lei only hopes that the world's genius doctors will gather as soon as possible to take a good look at what Zoey is all about.

"Miss Wen, a team of medical experts claiming to be from the Eagle Nation came out! I want to show Miss Li!" At

this time, someone from the hospital notified Wen Lei.

“Hurry up!”

Wen Lei immediately went outside to greet him in person.

This team is led by Richard.

He did not lie. There were medical experts from the famous war Eagle country in the team.

Wen Lei and others let them enter the hospital without any doubt.

“Miss Wen, we need to understand all the patient’s condition...”

Richard clicked sideways, trying to understand what happened in the laboratory that day.

“This...”

Wen Lei hesitated.

After all, in the results given by the rescue team, they were dead.

“Miss Wen, please don’t cover up, it is not conducive to our inspection! What’s more, we know the situation of you and Miss Zoey. You should have died in the explosion of the Shenlong Technology Base that day. Why are you still alive?”

Richard laughed Tao.

“Huh?”

Wen Lei was taken aback for a moment, he knew all about it.

“Well, I won’t hide it! The thing is probably...”

Wen Lei probably said about the particle collision, but also ignored a lot.

Richard didn’t hear what he wanted to hear, so he continued to ask.

“This shouldn’t be! So did Miss Zoey happen before the particles collided?”

“This is very important! Miss Wen, please explain it truthfully!”

...

Several other people also emphasized.

The purpose of Richard’s move was to inquire about Xu Zhengjie’s news.

“This...”

& Wen Lei hesitated.

“Well, before the particle collision, Zoey was conducting an experiment to transfer other people’s conscious thoughts to Zoey’s mind! But it was only a second to fail!”

...

Wen Lei probably said at the time. Scenes.

“Huh? Is there anything else?”

Richard was shocked.

Know that this is Xu Zhengjie!

“What about the other person? Is it alive?”

someone asked subconsciously.

Wen Lei shook her head: “No! Only the two of us are alive!”

“Ah?”

Richard and the others were extremely surprised.

If Xu Zhengjie really died, how could he still be conscious?

It shouldn't be!

At this moment, a voice rang in Richard's ear.

"Mr. Richard, we searched for the consciousness of Mr. Xu Zhengjie! It was nearby, I suspect it was in the hospital!"

"What?"

Richard was shocked.

It turned out that Richard's team was still testing outside.

"Uh!!!"

...

At this moment, a heart- piercing scream came from the ward.

"Faulted again!"

Wen Lei ran to the ward immediately.

Everyone followed.

I saw Zoey rolling on the floor with pain!

Make a devilish roar!

“Uh!”

Zoey grabbed the ground with both hands, leaving deep scratches on the ground.

She was maddened by the pain.

Wen Lei was frightened.

She has never seen Zoey so serious!

What’s going on here?

“Mr. Richard, I have basically determined the location of Mr. Xu Zhengjie’s consciousness, very close to you! Or right in front of you!” A

voice rang in Richard’s headset.

“Boom!!!” At

this moment, Richard had a thump in his head.

He looked at Zoey with a look of disbelief.

He seemed to understand all this.
