

The Return of the God of War [The Protector] Chapter 2487

arms!

Turn this crystal into a peerless weapon!

Contains all the power!

As for the materials, there is no need to look for them, and the metal resources here can be used.

Only this kind of metal can withstand this power and be tempered into a weapon!

Other materials are unbearable, and it is estimated that they will burst as soon as they are refined.

This weapon will become the world's first!

What a sword and sword!

All of them are younger brothers...

If this weapon is successful, if someone has the strength to use it, it is estimated that it can break through the ninth layer of the magical power of King Kong!

And after being a weapon, you can even use it yourself!

Play more power!

You can also dye them with Levilia plums.

They can also use it...

it's definitely a life-saving use!

Anyway, the benefits are unlimited!

Levi Garrison learned the ancient methods of refining weapons in the ancient books left by Master.

It can be refined on the spot!

"We have everything! Only the flame for refining...the general flame is not enough..."

"By the way, Shenyang!"

Levi Garrison remembered, among the weapons of the gods that day, there were those with flames.

That kind of flame is the most powerful he has ever seen.

This flame must also exist in this place...

"Look!"

Next.

Levi Garrison began to search for this kind of divine flame all over the mountains and plains.

Finally found in a volcanic crater.

The flames in the crater burn all year round and will never go out.

In fact, it is the burning material issue...

The resources in this place are too terrifying, and the energy contained in it is unimaginable.

Therefore, the burning flame will never go out, because the burning material has been supplied...

“Okay... what a powerful flame...” The

evil gods exclaimed.

Levi Garrison began to refine the refined metal...

This metal is too special, it can be transformed into a liquid, and it can temporarily become invisible, that is, invisible!

This is also the reason why there was no trace of the group of people in the first place.

They wear this kind of metal armor, which can become invisible.

In this way, no traces can be seen.

Like a ghost.

Levi Garrison used the purest metal to refine it.

In order to achieve the best state of the metal.

Otherwise, I can't bear this energy.

After tempering to the most extreme state of the metal, Levi Garrison took out the crystal and punched it into the metal.

Let the crystal and metal blend perfectly in the flames of God...

"It's still too strong, there is a little leftover!" The

crystal energy is too strong, and the metal still can't fully bear it.

Levi Garrison took out one-fifth of the crystals.

The remaining four-fifths are fused with metal...

"Boom boom boom..." In refining

.

Terrible energy fluctuations cause natural changes.

The wind roars!

Ten thousand beasts are running!

The world has changed color!

Thunder and lightning!

...

is a movement that no one has ever seen before!

After all, this weapon is too strong and too strong...

If it weren't for Levi Garrison's forcible pressure, it would be a trivial matter to destroy Forbidden Land No. 76!

"Hahaha..."

"It's really a god! The movement made is so big..."

"Hahaha, no matter how strong the dark God is, can he cope with the gods?"

... The

key is that they are afraid of the cannon fodder sent out before they enter After the forbidden area No. 76, all contact was severed.

The group of cannon fodder could not contact them, nor could they contact the cannon fodder.

Although Maya Industry does not know what happened inside.

But with such a big movement, everyone can imagine what happened inside.

Must be turned upside down, right?

No matter how strong the Dark God is, he must die!

Levi Garrison uses ancient methods to temper a peerless weapon.

There was too much movement.

Levi Garrison was also afraid that the outside world would know.

Hastily blocked this place, using power to raise an invisible wall to block it!

“Boom!!!”

After a while, a sword took shape!

Levi Garrison held it in his hand, feeling that he could pierce the sky with a sword!
