

Chapter: 3072

This man is also very helpless.

As long as Ye Junlin is a little later, he will report his family.

Although the power behind him is strong, he is not as strong as Ye Junlin.

He must have reported himself.

As a result, he pretended to be killed by Ye Junlin.

After removing this person.

The trap box also flew into Ye Junlin's hands.

Ye Junlin said lightly: "I just want you to reveal your identity, you are too arrogant!"

Pack it all up.

Ye Junlin left.

No one would have thought that the mysterious person and the two hundred gods all died so tragically.

The key point is that Ye Junlin's speed is too fast.

It took less than ten minutes to keep up with them and kill them Ye Junlin.

So that everyone has an illusion that Ye Junlin just left the island.

Where's the time to catch them, let alone kill them.

Even if the person in charge of the auction lets Ye Junlin leave.

Let him endure the pain of his daughter's wish to be lost in vain.

Therefore, people will also be sent to keep an eye on Ye Junlin.

Ye Junlin just left the island and suddenly disappeared.

Everyone thought they were lost.

Just when I was about to report, I found that Ye Junlin appeared again.

The time before and after is too short.

Everyone disagreed.

What can Ye Junlin do in such a short time?

I couldn't find where the mysterious man was, let alone robbing the magic medicine to kill.

No one would doubt it.

Ye Junlin disappeared for too short a time.

But no one thought that Ye Junlin was playing with the trap box in his hand.

He didn't dare to be tough.

Have to find a professional to solve it.

Now he thought about it, why there were no secret locks in the ancient books left by Master Cheap.

Otherwise he can unravel it himself.

It can only be said that the treasures that Master left for him at the beginning can only be applied to the previous period.

Times are changing so fast now that it is useless.

I can only pin my hopes on the person Ning Jinye said...

island.

The mysterious man's 350,000 pieces of spiritual energy crystals are moving here little by little.

A super transport plane rises and falls on the island.

"Huh? This is?"

Soon the people that Ye Junlin arranged on the island found some clues.

They found out after some inquiries.

These super transport planes actually came from the War Eagle Kingdom Sky Shield Bureau.

And these people involved in the transportation are actually from the Sky Shield Bureau.

Of course check it out.

They also hid their identities to some extent.

If it wasn't for Ye Junlin sending them such meticulous inquiries, it would be impossible to find out.

This mysterious person with resources that is not lost to Ye Junlin is actually related to the Sky Shield Bureau?

This message is important.

When the dark doctor secretly sent the message to Ye Junlin, it made him stunned.

I really didn't expect to have a relationship with the War Eagle Country.

"The forces behind War Eagle Nation!!!"

From the time when the Guardians of the Galaxy attacked the Lord of the Gods Laboratory, it used a special confrontation weapon. At that time, Ye Junlin noticed that there might be people behind the War Eagle Kingdom.

Otherwise, it is impossible for the Sky Shield Bureau to take out such an advanced weapon.

There is also the sleepy lock that the Sky Shield Bureau used on him.

This is obviously a technology beyond the current level of the Sky Shield Bureau.

This shows that there may be an existence similar to the laboratory of the gods behind the War Eagle Kingdom.

Of course, all attention was on the remnants of the Lab of the Gods.

It's horrible to imagine now.

Then when the aura storm swept the world, the War Eagle Nation used the sky-defying device, which was actually used throughout the country.

Abruptly blocked the sweep of the aura storm.

The difficulty of this sky-defying device is not comparable to that of the Daxia Safety Island project.

He is a device covering the entire War Eagle Nation!

No one has ever looked into this issue before.

Now that Ye Junlin thought about it carefully, he broke out in a cold sweat.

It looks like a device, and it is terrifying to the extreme.
