

Chapter: 3094

So far, this organization has 187,380 numbers.

This means that there are so many people in this organization...

The five people who invited Ye Junlin were No. 23, No. 29, No. 32, No. 33 and No. 45.

They were the first to join the organization.

Up to now, I have forgotten the bloody feud against Hydra, and what I think about is how to become stronger and how to build this organization into a great force that can compete with the previous great powers.

What they do every day is to expand their strength and mine resources.

And resources are prioritized for themselves.

Now all five of them are gods.

Using various means and resources, he abruptly opened the shackles of his body and became a god.

As for what the Hydra has to do with them?

They got strength and power, and that was enough.

Besides, now that the Zhanxiong Nation is so powerful, how can they take revenge?

It's not just their idea.

Also the idea of the seven founders of the organization.

They are doing it for themselves now...

Now the gods of this organization have expanded to more than seven hundred.

And they have found a lot of ways to artificially create gods, and the number of gods is still increasing.

After a while, it will be easy to break through a thousand gods.

Although they are not comparable to the top three forces, they can be compared to the fifth and sixth level.

And they believe that the power will become stronger and stronger.

Sooner or later, it can be compared with the top three.

In fact, many of these decision-makers are aware of their thoughts.

They simply seek profit for themselves and continue to strengthen the power of this organization.

But if you want revenge for Hydra, you can only listen to them.

Just get everyone together.

Otherwise there is no hope at all.

Even if you know the thoughts of these decision makers, this organization carries the last bit of hope.

They also have no way.

Just wait.

When the news of the 100,000 gods of the War Bear Kingdom was released, this revenge organization began to expand wildly.

In the name of revenge, maximize his own strength.

But they didn't realize one thing – although they just expanded wildly, they didn't seek revenge for Hydra.

But their existence is a threat to Hydra.

Must be eradicated!!!

Now that Hydra has made such a contribution to the War Bear Country, it has completely secured its position.

They are now fighting back.

After all, he is qualified to use more gods in the War Bear Kingdom.

These people or forces who seek revenge or threaten them must be eradicated.

This group of people was busy expanding their power, not looking for Hydra, but Hydra was eyeing them.

Their large-scale operations also make them vulnerable to exposure.

Coupled with the current strength of Hydra, it was easy to find the location of their lair.

“Borrow 5,000 gods from the War Bear Kingdom to surround this place!”

After the six remaining heads of Hydra unanimously decided, the eradication plan began.

Before, the War Bear Kingdom could give them up to 800 gods to stop Ye Junlin's reward.

But now they are qualified to use thousands or even tens of thousands of gods.

They checked the strength of this revenge organization, and in fact, they dispatched 2,000 gods and absolutely won it.

But in order to gain momentum, they had to dispatch five thousand gods at one time.

War Bear Kingdom readily agreed.

Now let them send 10,000 gods.

And the more gods are dispatched, the more propaganda it will be for them, thus shocking the world.

Baili and harmless!

Then, the six heads of Hydra led the five thousand gods to dispatch...

On the island, everyone is still thinking about how to strengthen themselves and the organization as always.

There are those who go out to expand their power, and there are those who cultivate themselves to increase their strength.

Especially the seven decision makers of the organization.

They are now basking in power and power.
