

# Chapter: 3104

Zhanxiong Kingdom's god-building plan, although it is led by Hydra, there is also a team here in Zhanxiong Kingdom.

Siberia Star has a special team, including modern technology, wizards and so on.

They have been working with Hydra to create batches of gods for the War Bear Kingdom.

Recently, the team of Siberia Star discovered an amazing phenomenon –

The gods and the non-gods have completely different roots.

Therefore, their research came to the conclusion that the root bone is excellent in order to absorb more aura and convert it into use, such as strengthening the essence, blood, bones and so on.

It's not a god, he doesn't have such a backbone, no matter how their plan with Hydra goes, it won't work.

The research found that the root bones of the gods are also different.

On this basis, it is necessary to distinguish between good and excellent.

The excellent root bone transforms and absorbs the aura more efficiently.

In layman's terms, he can easily convert the absorbed spiritual energy into power and achieve higher combat effectiveness.

Especially with some methods and ancient exercises, the power is even greater.

In fact, they slowly realized the essence of absorbing spiritual energy.

That is, the spirit root spirit bone that Zhen Mo Si said.

This is only the foundation of their cultivation. With such spiritual roots and bones, they can carry out their cultivation.

Otherwise you can't get in.

So the Siberian Star team found this amazing research result.

They want to carry out a bold and detached plan among the more than 100,000 gods – to create super gods.

It is to transform or refine the root bones on the basis of gods to achieve the best state, and completely create a group of existences that are above gods, called super gods.

This plan is actually extremely difficult, but the team immediately recalled Hydra to study it together.

In fact, the idea of them has already existed in the town magic department – to transform the root bone.

The general method in the Suppression Division is to use medicinal herbs or exercises to transform.

Or use some extremely ferocious methods to dig out the root bones of some terrifying beasts and transplant them to themselves to strengthen their roots.

If it is purely about the root bone, the root bone of the beast is definitely stronger than that of a human.

In particular, some powerful beasts are even stronger.

When their root bones are transplanted into a human body, it will be a heaven-defying change.

There is an even more vicious method –

That is to dig out the top spiritual roots and bones of others and transplant them into oneself.

However, this approach is rarely used.

Even if Zhen Mosi has heard it many times, no one has really used it.

Why do you say that the War Bear Kingdom is the first in the power list?

Not only do they have the most gods, they also have advanced ideas.

When other forces are thinking about how to obtain more resources to create gods.

They have been able to perfectly explain the birth of gods, and have discovered the secrets of gods to further create super gods.

And they have enough gods to run their experiments.

This is War Bear Country.

If Zhen Mosi knew about the research of War Bear Kingdom, he would not be able to help but praise him.

After all, it's a starter.

Research to the essence.

It truly opened the door to cultivation.

In fact, martial arts and technology research are the same thing.

Essentially there is no difference.

Isn't this, just researched together?

After the Hydras go back, it is temporarily impossible to come out.

They are also more and more crazy into the research.

Not to mention the number of gods, there is also the birth of super gods.

At present, it is estimated that once the super gods appear, at least one can defeat hundreds of gods, which is unimaginable.

No one in this world will shake them.

All will be on their knees before them by then.

And after some research on Ye Junlin's side, it finally came to an end...
