

# Chapter: 3105

Because Ye Junlin is a layman in organ surgery, it is impossible for him to study thoroughly.

And the mechanism is very mysterious.

Without a professional teacher watching, it would take at least several years for Ye Junlin to study thoroughly.

That's the speed of genius.

Therefore, Ye Junlin used the exclusion method.

Eliminate in one way or another.

Now, tens of thousands of ways have been ruled out, and only a hundred are left.

Moreover, Ye Junlin is sure that among these hundred kinds of secret lock solutions, there must be a solution to the magic box.

Within a month, he will be able to unlock the secret lock of the engine box.

Because the speed is not as fast as before, that is because the unlocking method was roughly ruled out before.

But there are a hundred more.

You have to get down to every detail.

Be careful to the extreme.

Because of the secret lock, as long as you fail to unlock it, the box will immediately self-destruct.

Ye Junlin didn't think he had spent so much time, and he would fall short by then.

So it will take a month.

Only he can confirm that it is correct to open the secret lock.

He is also breathing a sigh of relief now, resting a little, and then working hard for the certification for a month.

When you are resting, take a look at how Junjun is doing.

After all, I haven't seen Junjun's state for a long time.

Even if she has already solved half of the poison.

When Ye Junlin saw Junjun.

He was going to be terrified.

The resources that had been piled up in mountains before, were now gone.

what's the situation?

Ye Junlin's first thought, was this place robbed?

not good!

But after rushing over, he found that Junjun was safe and sound.

She is actually practicing.

Practice her own creation...

It is said by the Gods Lab to be similar to the legendary Qi training technique of the magician.

She is able to use all the natural elements between heaven and earth.

These heavenly materials and earthly treasures, as well as spiritual energy crystals, etc., are all she can absorb.

Therefore, she absorbed these elements during her cultivation.

This is the reason why Ye Junlin has accumulated mountains of resources and disappeared.

“By the way, poison!”

Ye Junlin suddenly wondered if Junjun would be poisoned because of his practice.

That's trouble.

Ye Junlin hurried up to check, and found a surprising phenomenon.

The toxins in Junjun's body have not changed and have not decreased.

But not only was there no poisonous hair, but some of the toxins were actually used by Junjun's own practice.

That is, Junjun Shu uses the toxins in his body to cultivate.

become part of her practice.

If this goes on for a long time, maybe all toxins can be applied by Junjun's exercises.

Junjun's self-created practice uses all the elements of the universe, and it's really amazing.

Even toxins can be absorbed and used.

The technique of refining Qi is indeed terrifying!

But even so, the poison is too strong.

The toxin that Junjun can use is a little, which can be ignored.

Then the poison still needs to be solved.

As long as the poison is in Junjun's body for a moment, then Ye Junlin will definitely not be able to sleep well.

Junjun is safe, and Ye Junlin is relieved.

He still asked people to ask about the changes these days.

The identity of Yan Zangsheng and the forces behind him are still being investigated.

There was no major change in the War Eagle Nation. Of course, the Black Hawk agents sent a message that the forces behind them were already strengthening the strength of the Sky Shield Bureau and the entire War Eagle Nation.

But it has nothing to do with Ye Junlin for the time being.

He didn't even care.

As for the big moves of Hydra and War Bear Kingdom, Ye Junlin was stunned.

“Huh? Super god plan?”

Ye Junlin asked.

“That's right! According to the information – there are differences between gods, but the super god plan of War Bear Kingdom this time is to completely distinguish this point!”

“That is, the gods of the gods! Has super strength! At least one enemy hundred!”

Doctor Dark said excitedly.
