

Chapter: 3127

The organization of revenge Hydra did not come.

But Li Ziran came first.

After knowing Ye Junlin's warning against Xiong Guo, they were all dumbfounded.

Do you think Ye Junlin is crazy?

Or the book daughter can't get rid of the poison?

Ye Junlin is concerned about Junjun's affairs, and of course Li Ziran is no exception.

There was no way before.

Now that the Tenjin Division is powerful, he has also come into contact with the Town Demon Division and the like.

Li Ziran has already contacted the Zhenmo Division and asked them to detoxify Junjun.

I even found out the whereabouts of the second half of the Poison Sutra.

But you have to pay a huge price to get it.

Currently still negotiating.

There is still hope.

As long as you get the second half of the Poison Sutra, Junjun's poison will definitely be unraveled.

As a result, Ye Junlin suddenly made this incident!

She is still wondering if something happened to Junjun?

That made Ye Junlin so crazy.

After all, Jun Jun has always been by Ye Junlin's side.

Most of the time she didn't know.

"Ye Junlin, what are you doing? Are you crazy? Going to warn the current War Bear Country? What qualifications do you have to warn others?"

"And Junjun? Did something happen to her?"

Li Ziran shouted anxiously.

"mother....."

At this moment, Junjun ran out and hugged Li Ziran at once.

Li Ziran and the others were stunned.

Looking at Jun Jun in disbelief.

"Junjun, are you... How are you? Are you poisoned? How is this possible?"

Li Ziran was surprised.

Looking at Junjun, her face is rosy and full of energy.

Where is the poisonous look?

But said detoxification, how is it possible?

Even though half of the poison had been absorbed by the strongest poison Gu, how could the remaining half of the poison be solved so easily.

At the very least, a magic medicine comparable to the 100,000-year-old snow lotus can be unlocked.

How did Junjun do this?

It's incredible.

Jun Jun said excitedly: "Yes, Jun Jun's poison has been detoxified, and there is no problem at all!"

"Of course there are some toxins that have already been used by me! I have used them in my exercises!"

Junjun did not forget to show it.

Applying toxins to her exercises immediately made everything around her wither.

When Jun Jun showed his strength, it was even more shocking.

Is this the strongest poison ever?

Why is she so powerful? ? ?

Too much beyond the gods.

With such a hand, everyone knows that no one in the Heavenly God Division can be Junjun's opponent.

Including the five Qinglong people with super spiritual roots and bones, they can't either.

Or five people can join forces to fight Junjun!

However, it is not unreasonable for Junjun to improve so fast.

After she got rid of half of the poison, she tried to practice the exercises she created.

Originally, she created her own exercises to use all the elements of the universe.

The resources that Ye Junlin obtained were just right.

Other gods absorb spiritual energy and absorb the essence of heaven and earth treasures, and the specific degree depends on the spiritual roots and bones.

Good spiritual roots and bones are absorbed more efficiently.

But you don't need this at all.

Even if she is fundamentally poor and unable to absorb spiritual energy, it will be fine.

She created her own exercises that could be absorbed like crazy, and it was the most efficient one.

In addition, Ye Junlin has sufficient resources, and the mountains of resources are provided for Junjun to practice.

So she has improved very quickly.

In addition, the magic medicine that Ye Junlin brought at the end was not only detoxified, but all the rest were absorbed by her and used in the exercises.

This is because Ye Junlin kept a part of the magic medicine, otherwise she might have absorbed it all.

Of course, it was Ye Junlin who was worried that Junjun support would explode, so he left a section.

However, in this case, it is easy for Jun Jun to be so powerful.

Everything is taken for granted.

Moreover, Junjun's self-created technique is really similar to the Qi-refining technique of Zhen Mosi.

The technique of refining Qi also absorbs spiritual energy in this way.
