

King of kings

1864

"The Yan Huang Empire is this powerful?"

"Mmhm, because Old Ancestor Tang is from the Yanhuang Empire, you are the pride of our Yanhuang Empire, so you inspire us."

Omi asked, "The families of those brothers of mine back then, there should be descendants alive as well."

"Of course there are, although the families don't exist anymore, but each family, compared to other families in the world, is still a large number."

"Well, that's good."

Yan Xin Yi said, "I just heard that soldier call you Old Marshal Xu?What do you mean?"

Xu Qing'er smiled, "Truth be told, just ten minutes ago, I was in the hospital with a tube in my mouth, and my sons and grandsons were gathered around my bed, preparing to see me off.I used to be the Grand Marshal of the Allied Human Forces, but now I'm old and retired."

"Oh, no wonder they call you Old Marshal Xu."

Although Xu Qing'er's martial arts skills weren't very strong, Ancestor Realm, she had reached Ancestor Great Perfection and seemed to be one step away from reaching the peak.

Omi noticed that in this human base, there were at least a hundred Zongshi Perfection.

When Omi was still practicing martial arts here, there wasn't a single Zongshi realm, Omi was the first one to step into the Zongshi realm, and now, there were more than a hundred Zongshi perfection. The first website m.kanshu8.net

The human leader said to Omi, "Old Ancestor Tang, you came back just in time, with you here, it was effortless to exterminate those robots, those robots, they aren't even considered human, they shouldn't exist.Their existence is meaningless to human evolution and development, they can't reproduce, they can only keep mining raw materials, building factories and producing machines, if this continues, the mother planet will be destroyed by them sooner or later.I think, Old Ancestor Tang, you also don't want our former planet to be over-exploited to the point where it's full of ravages."

Omi said, "Those robots, even if I don't have to exterminate them, sooner or later they'll be finished, and one day, the planet's resources will run out.They don't need to eat and sleep, but they need resources, without them, how can the robots survive."

The human leader said, "Those robots are highly intelligent, after the mother planet's resources are tapped out, they will come to outer space, and the current spaceships are very fast, the entire galaxy's resources are available for them to use, so calculated, let them perish on their own, I'm afraid it will take millions of years.Millions na, we three billion humans, how long can we last."

Omi was startled, he didn't expect that the resources in outer space would still allow them to consume them for such a long time.

It seemed that they really needed to be exterminated, otherwise, the humans in this world would definitely become extinct, and even if those robots were allowed to find a passage through another world, this scourge would still extend to another world. These robots were simply a cancer.

"Don't worry, since I'm back, naturally I won't let those robots continue their scourge, this world will eventually return to the path of the martial path. Only the martial path can truly allow a person to evolve, so called science, so called genetic potions, these, in the end, can't turn over such big waves." Omi said.

The human leader was busy saying, "Old Man Tang, you don't know ah, those robots, it's really not as bad as you think

The so easy to deal with. You were just on the home planet, and the robots that came out to kill you were just little soldiers, just ones they sent out to test you, the real robot masters, they didn't even show up."

"Uh, just to test me?"

"Yes, you don't know much about them, but we know too much about them. All those robots that tested you are still using laser cannons, and this is a robot soldier, not a robot master."

"Oh, I'm curious then, robots can still be experts?" Omi lightly smiled, although the human leader and Xu Qing'er and the others were full of worry, but as Omi was very clear, he was a strong man of the Transmigration Stage, no matter how strong the robot was ten thousand times stronger, it was not enough for Omi to have a hand, there was no need to worry.

However, Omi was a bit shocked that the robot could be so strong.

The human leader said, "Ancestor Tang, there are currently a total of 388 robot empires on the home planet, and among them, there are 10 robot empires, and their emperors, who have upgraded to the 28th generation of the original power, are so powerful that you simply cannot believe how strong they are."

"28 generations of original power?"

"The original power, a power that they robotically researched, and it's a power they've upgraded to 28 generations. Any one of these 10 robot empires, any one of them can exterminate us if they only find our human base."

Omi nodded, so to speak, that machine emperor who had upgraded to 28 generations of original power, their strength was at least equivalent to the peak-denying realm, and possibly even equivalent to the return to the Void realm.

"Damn." Thinking like this, Omi felt a little terrifying.

The human leader said, "Old Ancestor Tang, those 28th generation pilots, they're really strong, I feel that our human martial arts, no matter how much we train our flesh, we can't reach their level, no matter how much we train our flesh, no matter how much we train our flesh, our flesh is made of flesh, and their bodies are made of materials that are hundreds of times harder than alloy."

Omi said, "Please don't doubt the strength of the Martial Dao, you're just sitting there watching the sky, you have no idea how high the sky is and how strong the Martial Dao is when it reaches its

extreme. Just the kaiju you mentioned are equivalent to a human returning to the Void, believe it or not, I'll get a few humans returning to the Void to come here and let you see with your own eyes who is more powerful."

"Ugh."

Omi really wanted to go back to the other world and get a few Returned Void strongmen to come over and show them, but Omi only needed ten minutes to bring someone over anyway.

Of course, Omi could have done it himself, but it felt too pricey for him to take on those robots personally. Omi threw down a scroll, there was no telling how many robots he would have to destroy, fighting with Omi's level wasn't even called fighting, and Omi wasn't interested in killing those robots, so he might as well bring over a few of the Returned Void Strongmen from the other world.

"Old Ancestor Tang, you said another world, I was about to tell you, those robots also know about the other world and are looking for a passage all over the world, those robots also want to travel to the other world."

Omi trailed off, while it was true that those robots could bring destruction to the other world, it was impossible to achieve victory, because the strongest robots in the other world, the Returned Void, could definitely defeat the strongest robots. Unless, of course, the strongest robots had evolved again.
