

King of kings

1870

"I'm sorry, Taizu, I lost." Shang Wuyun said facelessly.

Robot Black Eagle said, "Senior Tang, my power has reached a level where I can break the void, so I win."

Omi sighed, "It's just that I don't care about you robots, in short, no harming any humans in the future."

"Senior don't worry, humans created us, we never wanted to harm humans, the reason we control this planet is just that we don't want humans to continue destroying themselves. Senior may not believe it, if we robots hadn't taken control of this planet back then in time, then you would have returned today and there would no longer be any trace of humans. After we developed the antidote, we released it into the air, and only after that did no one die. And today, is the air here a lot better than it was twenty years ago? If you don't believe me, ask all the humans behind you."

Tang looked back to the humans in the sky, and they all had some surprise on their faces that seemed genuine.

"Alright, Blackhawk, I'll allow you to continue to exist."

"Thank you Senior Tang, I, Blackhawk, am the first intelligent robot to appear, all robots are under my control, I will now program all robots to permanently not be allowed to harm humans, and to live in peace with humans forever." After Blackhawk finished speaking, he immediately placed a program in his head and sent it to each robot's chip.

Omi said to the human leader, "Alright, problem solved, in fact, the robots don't care to be enemies of humans at all, instead, they save the survival of humans in times of crisis. If the robots really wanted to exterminate the humans, with their returning ancestor level strength, the humans would have died long ago."

The human leader was busy saying, "Don't be fooled by these robots, Old Ancestor Tang, I think it's safer for you to exterminate them, after all, if they are not of my race, their hearts will be different. Only when they are completely exterminated will the humans be able to truly control our land."

Omi was very upset with this human leader, and snorted, "I see, you are afraid that your rights will be weakened, all these years, the humans have attacked the robots time and time again, you are the one who ordered it, right? the robots never actively attacked the humans, and you have ordered the robots to attack time and time again, causing so many casualties, I see, it's your own selfishness that's at stake, damn you."

After saying that, Omi's mind moved and the human leader turned into nothingness. First URL

Blackhawk was busy saying, "Senior Tang is wise."

"Alright, let's do it, Black Hawk, I believe in you, you can make your robot, make this world a better place, make humans live happier, and, make the path of human martial arts smoother."

"Senior don't worry, we can definitely do it. Also, Senior Tang, I have a favor to ask." Black Eagle said.

"Say."

"Can Senior bring me along, I want to follow Senior, I hope Senior won't dislike me for being weak."

"Uh, bring you along?"

"Yes, I can step into the Void now as well, but I don't dare to travel to the higher realms. And if I travel to the higher realms, I'll be cut off from all the robots here, and I haven't dealt with what's going on here yet."

"If you want to follow me, you can, maybe with your robot advantage, you can still help me a bit in the spirit world."

"Thank you Senior, I will definitely serve you in the saddle."

&nb

sp; "Then you deal with the matter here first, and when you're done, I'll come back to take you away."

"Yes, Senior."

Omi turned back to the three billion humans and said, "From now on, live well, practice your martial arts, stop destroying this planet, and return to the right path of martial arts."

"Thank you, Senior Tang." Three billion humans were busy thanking each other, the entire sky, dense, fortunately Omi was strong enough, otherwise those in the far back would not be able to hear what Omi said.

Omi then casually opened the spatial channel with a stroke of his hand, bringing the dozens of Returning Void strong people back to the other world, along with Xu Qing'er and Yan Xingyi, and the little white dragon, these days, the little white dragon was with Yan Xingyi.

So far, the technological world, the robots and the humans, had come to an end, and Omi didn't know what the future would hold.

However, as long as that Black Hawk followed Omi, then it was like Omi controlling all the robots.

Because Black Hawk was the highest level robot, he commanded all the robots. Therefore, it would be the same as Omi taking control of all the robots.

Perhaps, the robots were still too weak at the moment, but in the future, it would grow into a powerful force, that was unknown.

Omi was still quite optimistic about Black Eagle's development in the Spirit World.

As such, Omi lived in the Great Martial Empire, for five years.

After five years, Omi returned to the world of science and technology and prepared to take Black Eagle away.

"Paying respects to Senior Omi." Blackhawk was very happy to see Omi here.

“Blackhawk, has everything been taken care of here?”

“Senior don’t worry, I took care of it all, now that humanity is on the right track, in a few hundred years, the population of this world will be back to where it was in the beginning. We, the robot clan, will never interfere in human politics again.” Blackhawk said.

Omi said, “Blackhawk, you are now taking orders from me, while everyone here, the robots, are taking orders from you, right.”

“Yes, because I was the first robot to generate intelligence, all the other robots are derived from my code, I am the highest ranking robot, I am their only as well as eternal clan leader. I have now empowered some second generation intelligent robots to manage things here on their behalf, in the future if any of them second generation intelligent robots are able to step into the void anymore, they will come directly to me in the spirit world, meanwhile, they will empower the next generation, and so on and on. I believe that I can create more clans in the spirit world.”

“Very well, I hope that one day in the future, I can see your robot clan, grow and become a powerful force in the spirit world. Then, let’s go.”

Omi left with Black Eagle and arrived at the Great Martial Empire.

“Brother, when are we going to return to the Spiritual World.” Little White Dragon seemed to be about to get fed up, after all, after living in the Great Martial Empire for five years, it was too much to stay in a place without spirit energy.

Omi said, “We’ll leave right away, if we go back now, we won’t be able to return to the Six Seas, there’s still half a year left before the Rainbow Bridge opens and we’re in the Spiritual World.”

“Brother, I really can’t stand this place any longer.”

“Alright, let’s go now.”

Omi called out Yan Xinyi, Xu Qing’er, and thousands of descendants, all of them
